Master of Applied Computing

Program Details

The course-based Master of Applied Computing* is a professional program that will provide you with a solid foundation of the industry oriented practical aspects of computer science.

The skills and knowledge that the program offers will allow you the opportunity to develop a successful career in the growing software industry through practical projects, internships and in-class training.

The Master of Applied Computing program has been specifically designed to expose you to the latest technologies and developments in a number of high-demand fields.

You will study and live in Canada for approximately 16 months while enrolled in eight prescribed courses and one Project/Internship course.

Courses will span both the fields of computer science and business to provide you with the tools that you will need to succeed in this growing, global industry.

The University of Windsor

The University of Windsor's mission is to enable people to make a better world through education, scholarship, research and engagement.

As Canada's most comprehensive university, UWindsor includes a strong emphasis on the student learning experience in its 140 undergraduate, graduate and professional programs. The University of Windsor is accredited by the Government of Ontario, Canada.

Founded in 1857 as Assumption College, it was incorporated as a publicly funded university in 1963. Its programs are overseen by the Province of Ontario's Ministry of Training, Colleges and Universities. Current enrolment includes 17,000 full- and part-time students from more than 100 countries from across the world.

Courses may include:

Advanced Software Engineering Topics

Advanced Database Topic

Internet Applications and Distributed Systems

Advanced Computing Concepts

Advanced Systems Programming

Networking and Data Security

Finance in a Global Perspective

Marketing

Managing Employees

Project/Internship

The Master of Applied Computing program is a new program offered by the University of Windsor starting in September 2014. Prospective students are advised that offers of admissions to this program will be made only after the Ontario Universities Council on Quality Assurance has approved this program.

Admission Requirements

- Confirmation of a four-year Bachelor in Computer Science or a related discipline from an academic institution approved by the University of Windsor.

- The equivalent of a 70% average or higher in cumulative undergraduate studies or a 77% in the last two years of study (when converted to Ontario standards)

- Demonstrated English proficiency by meeting or exceeding a 6.5 score on the IELTS test or approved equivalent

- A successful interview with a representative of the University of Windsor

- Two letters of reference

- A statement of interest including a description of a major technology project you have undertaken in the past three years.

Applicants with a four-year bachelor degree in other non-CS disciplines will be eligible for admission if they are accepted into and complete the University of Windsor's one-year Bachelor of Computer Science for University Graduates program with a 70% average or better.

English Language Training

You may be conditionally admitted into our program if your English Proficiency test score does not meet our minimum requirement, by taking additional English language training at UWindsor prior to starting your graduate program. If you require English language training, our Centre for English Language Development has a program for you. Courses range from 6-16 weeks, depending on your assessment test.

Apply

Our online application service is convenient with easy to review application information and processing. Access application information and apply online at **www.uwindsor.ca/professionalprograms**

Fees

Fees cover all program costs, but do not include books, living expenses and health insurance. See our website for the current tuition payment information and schedule or email **apply@uwindsor.ca**

Vibrant and Dynamic

Windsor is one of the most ethnically diverse cities in Canada and its geographic location speaks to its distinctive character. The communities near UWindsor are famous for their international flair and flavour. You can find dozens of international grocery stores and restaurants here. The convenient public transit system will take you where you want to go and many amenities are within a short walking distance from campus.

Picture Yourself Here

The University of Windsor campus is large enough to offer plenty of variety, and yet it's small enough for you to be known by name.

You will find unlimited opportunities to get involved in academic, recreational and social activities– whether to broaden your mind or your circle of friends.

The International Students Society and numerous other student clubs provide friendship and support, as well as academic, social and recreational activities.

At the St. Denis Athletic Centre, you can jog on the indoor track, swim laps in a large, indoor pool or work out in our state-of-the-art weight and exercise rooms.
