

EXAM CONFLICTS DUE TO OBSERVANCE OF RELIGIOUS HOLY DAYS.

Students who are unable to write a final examination(s) during the regularly scheduled time slot because of a conflict with religious conviction must apply for the alternative examination(s) in the course(s) involved by the end of the normal add/drop period for the particular session. The Registrar's Office will schedule the alternative examination(s) for those students in another slot(s) within the regular examination period. Please download the appropriate form from <http://www.uwindsor.ca/registrar> and submit to the Office of the Registrar.

WRITING THREE OR MORE EXAMS ON THE SAME DAY

A student scheduled to write three invigilated final examinations in one calendar day, or three or more final examinations in consecutive time slots over a 24-hour period, may apply to have one examination rescheduled on an alternate examination day. The determination of which examination shall be rescheduled and the date of the alternate examination (may be the last possible day of the examination period) shall be made by the Registrar. Please download the appropriate form from <http://www.uwindsor.ca/registrar> and submit to the Office of the Registrar.

Note: These applications must be submitted by the end of the fourth week of classes (second week of classes for 6 week courses).

	The Canine Impact: Exploring the Dog-Human Relationship This course will explore the significance of dogs in a human world from a range of perspectives, including biological, ethical, historical, psychological, and social. From the evolution of the domestic canid to the unique construction of breeds to status as a family member, we will examine the dog's role and value as protector, hunter, and companion within the contexts of evolution, domestication, behaviour, and cognition. Theories and complexities of the caninehuman relationship will be explored through readings, discussions, media, debates, observation, and experience. Prerequisite: 14-51-160, or permission of the instructor.

Starting Fall 2014, 64-412 will be offered in Fall-Winter and be worth 6 credits. Students with thesis option following calendars previous to Fall 2014 (when the thesis course offered in the summer was worth 9 credits) must take a 3-credit Physics course at the 300 or 400 level in lieu of the three credits short. If you cannot find a suitable course, contact a Physics Department Advisor for help.												
0364-463		Special Topics in Physics										
Section	1	3.00	LEC	TR	10:00	11:20AM	Dillon Hall	365	TBA	Dec 11	03:30pm	
Mathematical methods for physicists. A physics-based approach to the utilization of advanced mathematics commonly encountered in upper year and graduate physics courses and a partial introduction to some exotic objects in physics that are not-so-typically encountered. Topics are not limited to, but may include: the ubiquitous differential equations in physics and their solutions (e.g. spherical harmonics, Bessel functions, Fourier series and Fourier transforms); complex variables and analysis; symmetries and their importance to physics; the variational principle and the importance of action; coordinate transformations; exotic objects (black holes, particles, higher dimensional objects); and paradoxes in physics.

Section 3	3.00	LEC	TR	10:00	11:20AM	HK Building 143	TBA	Dec 16 03:30pm
This course will introduce you to complementary and alternatives therapies (CAM) available in Canada that are not considered part of conventional or western medicine. The purpose of this course is to understand the principles, philosophy, and nature of practice of complementary and alternative therapies. Evidence-based research and clinical experience will be presented to critically assess the effectiveness of these CAM therapies. Examples of some of the therapies that will be covered include: Naturopathic Medicine, Traditional Western Healing, Traditional Chinese Medicine, Ayurvedic Medicine, massage, hemeopathy, manual therapies, reiki, yoga, chiropractic, botanical medicine, osteopathy, aromatherapy, and hydrotherapy.

Section 4	3.00	LEC	MW	02:30	03:50PM	HK Building 143	Krause, Matthew	Dec 18 03:30pm
Components of the musculoskeletal (MSK) system (skeletal muscle and motor neurons, connective tissue, bone) will be examined in detail. Tissue function will be illustrated by examining: 1) cell types found in MSK tissues including stem cell populations, 2) cell signaling and gene expression responses to various exercise stimuli (resistance and endurance training), and 3) selected aspects of fatigue, injury, and disease.
