SESSIONAL APPOINTMENT – Winter 2024

The Department of Chemistry and Biochemistry intends to offer the following course during the Winter 2024 semester which might not be staffed by full-time faculty members as part of their normal teaching load. In accordance with section 54-07 of the 2017-2025 Collective Agreement, the department invites applications from suitably qualified individuals who are interested in teaching the following course.

New Applications are required to include the following materials:

- A letter of application that includes:
 - the course(s) applied for and a statement of citizenship/immigration status, and
 - a brief statement explaining how the applicant's teaching and research background prepares them to teach the particular course for which they are applying.
- A detailed and current curriculum vitae
- Evidence of qualifications (i.e., transcripts, certification of degrees, courses taken, dissertation and thesis topic, etc.)
- A teaching dossier and/or the following:
 - a statement of teaching philosophy and interests (maximum of 250 words)
 - indications of successful teaching (i.e., official SETs or equivalent for all courses taught)
- Two (2) letters of reference
- Minimum of a Master's or equivalent with preference for those with a Chemistry or Biochemistry or related natural science background, with university teaching experience at the undergraduate level.

All other candidates who have previously taught at the University of Windsor, Department of Chemistry and Biochemistry are strongly encouraged to provide an updated curriculum vitae and must provide one if it has been 3 years since they have taught in the department. Candidates should also provide a statement that explains how their teaching, research and professional experience prepares them to teach the particular course(s).

BIOC-3110 Metabolism II	The utilization of phosphate bond energy will be illustrated by carbohydrate, fatty acid, nucleotide and lipid biosynthesis, hormonal (G-proteins) and metabolite regulation, biological membranes (structure and transport mechanisms) and contractile processes (muscle biochemistry). (Prerequisite: BIOC-3100.) (2 lecture hours a week.)
--	---

Subject to budgetary approval and sufficient enrolment

Submit complete applications to Dr. Drew Marquardt by e-mail to chembiohead@uwindsor.ca

by **Thursday, September 28th, 2023**

The University of Windsor is committed to equity in its academic policies, practices, and programs; supports diversity in its teaching, learning, and work environments; and ensures that applications from members of traditionally marginalized groups are seriously considered under its employment equity policy. Those who would contribute to the further diversification of our faculty and its scholarship include, but are not limited to, women, Aboriginal peoples, persons with disabilities, members of visible minorities and members of sexual minority groups.

Only those successful will be contacted.

Dr. Drew Marquardt
Acting Department Head of Chemistry and Biochemistry
