## **Transportation Strategies:** **From a Commercial Consulting Perspective**

Jacobs is a global solutions company that continues to hold the #1 ranked firm on the ENR Top 500 Design Firm list. As Jacobs continues to grow and look to the future, consulting and advisory solutions is a key element of its growth strategy and Jacobs' Strategic Consulting practice is at the forefront of that growth. Jacobs Strategic Consulting bridges the gap between traditional management consulting and A/E services to advance organizational strategies, reduce environmental impact, and improve social and economic outcomes. Paula will present on transportation projects that the Strategic Consulting team at Jacobs has worked on, ranging from rail to aviation to bridges (including the local Gordie Howe International Bridge project). In addition to key projects that the Strategic Consulting team has worked on, the presentation will also broadly cover Jacobs' global capabilities, and emerging industry trends.

*Paula Nguyen is a Senior Consultant with the Jacobs Strategic Consulting practice. She has been with Jacobs for over 4 years and has a total of over 7 years of working experience in the infrastructure sector. Paula has been involved in the provision of strategic and technical advisory services to both public and private sector clients on large scale P3 infrastructure projects. Her project experience spans across North America, Caribbean, and South America and includes highway, bridge, tunnel, rail, transit, and aviation projects. She is currently a member of the leadership team for the Transportation Research Board Young Members Council - Aviation and the Young Professional Liaison Member for the Terminals & Facilities Committee at the Airport Consultants Council. She is also a contributing member of the Jacobs Aviation Planning Community of Practice and is part of Jacobs' Emerging Leaders in Aviation group. Paula is an alumna of the University of Windsor having completed her BAsC in Civil Engineering and also holds a MASc in Transportation Engineering from the University of Toronto.*
