

Research is an essential part of your academic life, but how do you find the right grants and succeed in getting funding? The Office of Research and Innovation Services is here to support you in your research and knowledge translation.

What we do:

ORIS administers research grants and contracts and is the point of contact for the federal granting councils, government ministries, industry, associations and foundations which provide financial support university scholarship research and creative activities. ORIS can help you identify funding, connect with research partners, prepare great proposals and manage the grants you've won.

Steps to getting a grant reviewed:

- 🔍 Find the right grant for your research
- 🗣️ Discuss with your Research Coordinator
- ✍️ Prepare your grant proposal
- 📄 Share with your Research Coordinator for an expert review!
- 📁 Submit an ERSO record to obtain internal approvals
- ✉️ Share your results with your Research Coordinator
- 🏠 Receive your research grant account details
- 🧪 Start your research!

What else can we help you with?

- Making your research equitable, diverse, and inclusive
- Safeguarding your research and understanding research security guidelines
- Protecting your intellectual property and supporting technology transfer
- Collaborating with industry and community partners

Who to contact about your grant

Sara Kenno
Research Coordinator - Engineering & HK
skenno@uwindsor.ca

Michelle Nevett
Research Coordinator - Science & Business
mnevett@uwindsor.ca

Natasha Wiebe
Research Coordinator - Arts, humanities and social sciences
nwiebe@uwindsor.ca

Ingrid Qemo
Research Coordinator - Health Research
iqemo@uwindsor.ca

Nicole Noel
Research Coordinator - Institutional Projects
nnoel@uwindsor.ca

Kate Rosser-Davies
Research Systems and Metrics Coordinator
krdavies@uwindsor.ca

Youstina Asaad
Research Facilitator - internal grants and Canada Research Chairs
tinaa@uwindsor.ca

Gagneet Kaur
Research Administrative Coordinator
gagneetk@uwindsor.ca

Research Finance
Grant accounts, reporting and other grant related financial issues
resfinance@uwindsor.ca

RESEARCH PARTNERSHIPS AND TECHNOLOGY TRANSFER

What is technology transfer?

Technology Transfer refers to the process of transferring knowledge and discoveries from one organization to another. Our office helps you bring your ideas and technologies from your research lab to the market to benefit society

The University of Windsor highly values research and innovation and has a creator-owned Intellectual Property (IP) policy. Inventors and creators can determine if they wish to seek the assistance of the University of Windsor for IP protection and commercialization of their research. As per the Windsor University Faculty Association (WUFA) Collective Agreement, Articles 34, 35 and 36 outline that all faculty researchers are required to disclose any new technology and/or patent application(s) to ORIS via the Technology Disclosure form found on the Research Partnerships website uwindsor.ca/research-partnerships/

What are Research Partnerships?

Research partnerships involves collaborating with industry, community, and other academic partners on research projects. Our office helps to match-make, find partnership funding, and draft mutually beneficial and sustainable partnership agreements and contracts.

Services for Faculty Inventors:

Industry-Researcher Collaborations:

- Assist with securing research partnerships, industry collaboration, support, and funding
- Identify opportunities for new research partnerships and other external funding to facilitate research
- Support negotiating terms of research collaboration agreements

IP and Commercialization:

- Assist faculty members in identifying intellectual property, forms of IP protection, and commercialization of their research
- Protect and manage IP
- Identify sources of funding that can support increasing technology readiness level (TRL) of the invention
- Market and transfer the technology to industry receptors
- Draft, negotiate, and sign agreements and contracts, including licensing agreements

IP Education:

- Provide workshops and educational content for faculty, staff, and students regarding IP and commercialization
- Engage the regional innovation ecosystem to broadly advance IP education initiatives and resources while leveraging available resources

Vesna Kaps, L.L.B., J.D.
