AUDITORS' REPORT TO THE TRUSTEE

We have audited the statement of net assets available for benefits of the fund of the University of Windsor Retirement Plan for Faculty and Certain Employees as at June 30, 2008 and the statement of changes in net assets available for benefits for the year then ended. These financial statements have been prepared to comply with Section 76 of the Regulations to the Pension Benefits Act (Ontario). These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the net assets available for benefits as at June 30, 2008 and the changes in net assets available for benefits for the year then ended in accordance with the basis of accounting as disclosed in note 2 to the financial statements.

These financial statements, which have not been and were not intended to be, prepared in accordance with Canadian generally accepted accounting principles, are solely for the information and use of the Trustee of the University of Windsor Retirement Plan and the Financial Services Commission of Ontario for complying with Section 76 of the Regulations to the Pension Benefits Act (Ontario). The financial statements are not intended to be and should not be used by anyone other than the specified users for any other purpose.

UNIVERSITY OF WINDSOR RETIREMENT PLAN FOR FACULTY AND CERTAIN EMPLOYEES

(Registration Number: 0366849)
Notes to Financial Statements

Year ended June 30, 2008

1. DESCRIPTION OF PLAN

The following description of the University of Windsor – Retirement Plan for Faculty and Certain Employees (the “Plan”) is a summary only. For more complete information, reference should be made to the Plan’s text.

(a) General

The University of Windsor sponsors two pension plans, one for faculty and certain other employees and the second for other employees. The plan for faculty and certain other employees is a money purchase plan with a defined benefit minimum guarantee. The plan for other employees is a defined benefit plan.

The Pension Fund (the “Fund”) holds the assets for both of the University’s Pension Plans (the Faculty and Certain Employees Plan and the Employees’ Retirement Plan). Although the Plans are distinct and separate, the assets are invested jointly under a Master Trust Agreement in order to maximize investment income while minimizing administrative costs and management fees.

(b) Funding policy

The Pension Benefits Act of Ontario requires that the University of Windsor, the Plan’s sponsor, must fund the benefits determined under the Plan. The determinations of the value of these benefits are made on the basis of a triennial actuarial valuation.

(c) Income taxes

The Plan is a Registered Pension Trust as defined in the Income Tax Act and is not subject to income taxes.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of presentation

These financial statements have been prepared in accordance with the significant accounting policies set out below to comply with the accounting requirements prescribed by the Financial Services Commission of Ontario for financial statements under Section 76 of the Regulations to the Pension Benefits Act (Ontario). The basis of accounting used in these financial statements materially differs from Canadian generally accepted accounting principles because it excludes the actuarial liabilities of the plan. Consequently, these financial statements do not purport to show the adequacy of the plan’s assets to meet its pension obligations.

(b) Investments

Investments are stated at fair value. In determining fair values, adjustments have not been made for transaction costs as they are not considered to be significant. The change in the difference between fair value and cost of investments at the beginning and end of each year is reflected in the statement of changes in net assets available for benefits as current period change in market value of investments.

Notes to Financial Statements

Year ended June 30, 2008

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(b) Investments (continued)

Fair values of investments are determined as follows:

Bonds and equities are valued at year-end quoted market prices where available. Where quoted prices are not available, estimated fair values are determined using alternative sources in the industry.

Short-term notes, treasury bills and term deposits maturing within a year are stated at cost, which together with accrued interest income approximates fair value given the short-term nature of these investments.

Guaranteed investment certificates, term deposits maturing after a year and mortgages are valued at the present value of estimated future cash flows discounted at interest rates in effect on the last business day of the year for investments of a similar type, quality, and maturity.

Pooled fund investments are valued at the unit values supplied by the pooled fund administrator, which represent the Plan's proportionate share of underlying net assets at fair values, determined using closing market prices.

(c) Net realized gain on sale of investments

The net realized gain on sale of investments is the difference between proceeds received and the average cost of investments sold.

(d) Investment income

Investment income, which is recorded on the accrual basis, includes interest and dividend income.

(e) Foreign currency

Transactions in foreign currencies are accounted for using the exchange rates in effect at the transaction date. At year end, investments in foreign currencies are accounted for at the rates of exchange in effect at year end and the resulting unrealized gains or losses are included in the current period change in market values of investments.

(f) Use of estimates

The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the dates of the financial statements and the reported amounts of changes in net assets available for benefits during the year. Actual results could differ from those estimates.

(Registration Number: 0366849)
Notes to Financial Statements

Year ended June 30, 2008

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(g) Changes in accounting policies:

Effective July 1, 2007, the Plan adopted EIC-168, Accounting by Pension Plans for Transaction Costs. This abstract requires the transaction costs, such as brokerage commissions incurred on the purchase or sale of securities, to be expensed rather than included in the fair value of investments on initial recognition or subsequent remeasurement. This is a change from prior periods where transaction costs on purchases were an addition to the average costs of the investments and transaction costs on sales were a reduction from the sale proceeds. For financial reporting purposes, on July 1, 2007, the Plan adopted the new accounting policy on a retrospective basis, without restatement of prior periods. There is no impact on the net assets available for benefits of the Plan as a result of this change in accounting policy. Although there is no effect on the total increase in net assets available for benefits, there is a change in the following components: net realized gain on sale of investments and current period change in market values of investments.

(h) Future changes in accounting policies:

(i) Capital disclosures:

In December 2006, the CICA issued a new handbook section 1535, *Capital Disclosures*, which requires an entity to disclose its objectives, policies and processes for managing capital. This new standard is effective for the Plan beginning July 1, 2008.

(ii) Financial instruments:

In December 2006, the CICA issued two new handbook sections: 3862, *Financial Instruments – Disclosures*, and 3863, *Financial Instruments – Presentation*. These new standards are effective for the Plan beginning July 1, 2008.

These sections replace CICA handbook section 3861, *Financial Instruments – Disclosures and Presentation*. These new sections enhance disclosure requirements on the nature and extent of risks arising from financial instruments and how the entity manages those risks.

Management is currently reviewing the impact of these new standards on the presentation of the 2009 financial statements.

3. FUNDING POLICY

The University is required to provide funding, based on triennial valuations, necessary to ensure that benefits will be fully provided for at retirement. The University's funding policy is to make contributions from time to time using the level premium method as determined by the actuary.

The most recent actuarial valuation for funding purposes was prepared as at July 1, 2007 by William M. Mercer Limited. A copy of the valuation was filed with the Pension Commission as required by the Pension Benefits Act of Ontario.

6. ADMINISTRATIVE EXPENSES

	2008	2007
	\$	\$
Investment management fees	709,537	722,667
Actuarial fees	284,390	245,448
Sponsor administrative fees	74,549	74,395
Trustee fees	74,999	71,078
Audit fees	5,070	5,619
Miscellaneous	70,424	58,626
	1,218,969	1,177,833

7. FINANCIAL INSTRUMENTS

(a) Fair values

The fair values of investments are as described in note 2. The fair values of other financial assets and liabilities, being cash, accrued interest and dividends, and accrued liabilities approximate the carrying values due to the short-term nature of these financial instruments.

(b) Associated risks:

(i) Market price risk:

Market price risk is the risk that value of an instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issue or all other factors affecting all instruments traded in the market. As all of the Plan's financial instruments are carried at fair value with fair value changes recognized in the statement of changes in net assets available for benefits, all changes in market conditions will directly affect the change in net assets available for benefits. Market price risk is managed by the Administrator through construction of a diversified portfolio of instruments traded on various markets and across various industries. In addition, market price risk may be hedged using derivative financial instruments such as futures contracts.

(ii) Foreign currency risk:

Foreign currency risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign currency rates. The Plan invests in financial instruments and enters into transactions denominated in U.S. dollars. Consequently, the Plan is exposed to risks that the exchange rate of the foreign currency may change in a manner that has an adverse affect on the value of the portion of the Plan's assets or liabilities denominated in currencies other than Canadian dollars. The Plan's overall currency positions and exposures are monitored on a regular basis by the Administrator.

(iii) Liquidity risk:

Liquidity risk is the risk that the Plan will not be able to meet its obligations as they fall due. The Plan maintains an investment policy, as approved by the Administrator, which contains assets mix guidelines which help to ensure the Plan is able to liquidate investments to meet its pension benefit or other obligations.
