AUDITORS' REPORT TO THE TRUSTEE

We have audited the statement of net assets available for benefits of the fund of the University of Windsor Retirement Plan for Faculty and Certain Employees as at June 30, 2010 and the statement of changes in net assets available for benefits for the year then ended. These financial statements have been prepared to comply with Section 76 of the Regulations to the Pension Benefits Act (Ontario). These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the net assets available for benefits as at June 30, 2010 and the changes in net assets available for benefits for the year then ended in accordance with the basis of accounting as disclosed in note 2 to the financial statements.

These financial statements, which have not been and were not intended to be, prepared in accordance with Canadian generally accepted accounting principles, are solely for the information and use of the Trustee of the University of Windsor Retirement Plan and the Financial Services Commission of Ontario for complying with Section 76 of the Regulations to the Pension Benefits Act (Ontario). The financial statements are not intended to be and should not be used by anyone other than the specified users for any other purpose.

UNIVERSITY OF WINDSOR RETIREMENT PLAN FOR FACULTY AND CERTAIN EMPLOYEES

(Registration Number: 0366849)
Notes to Financial Statements

Year ended June 30, 2010

1. DESCRIPTION OF PLAN

The following description of the University of Windsor – Retirement Plan for Faculty and Certain Employees (the “Plan”) is a summary only. For more complete information, reference should be made to the Plan’s text.

(a) General

The University of Windsor sponsors two pension plans, one for faculty and certain other employees and the second for other employees. The plan for faculty and certain other employees is a money purchase plan with a defined benefit minimum guarantee. The plan for other employees is a defined benefit plan.

The Pension Fund (the “Fund”) holds the assets for both of the University’s Pension Plans (the Faculty and Certain Employees Plan and the Employees’ Retirement Plan). Although the Plans are distinct and separate, the assets are invested jointly under a Master Trust Agreement in order to maximize investment income while minimizing administrative costs and management fees.

(b) Funding policy

The Pension Benefits Act of Ontario requires that the University of Windsor, the Plan’s sponsor, must fund the benefits determined under the Plan. The determinations of the value of these benefits are made on the basis of a triennial actuarial valuation and any current legislative requirements.

(c) Income taxes

The Plan is a Registered Pension Trust as defined in the Income Tax Act and is not subject to income taxes.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of presentation

These financial statements have been prepared in accordance with the significant accounting policies set out below to comply with the accounting requirements prescribed by the Financial Services Commission of Ontario for financial statements under Section 76 of the Regulations to the Pension Benefits Act (Ontario). The basis of accounting used in these financial statements materially differs from Canadian generally accepted accounting principles because it excludes the actuarial liabilities of the plan. Consequently, these financial statements do not purport to show the adequacy of the plan’s assets to meet its pension obligations.

(b) Investments

Investments are stated at fair value. In determining fair values, adjustments have not been made for transaction costs as they are not considered to be significant. The change in the difference between fair value and cost of investments at the beginning and end of each year is reflected in the statement of changes in net assets available for benefits as current period change in market value of investments.

RETIREMENT PLAN FOR FACULTY AND CERTAIN EMPLOYEES

(Registration Number: 0366849)
Notes to Financial Statements

Year ended June 30, 2010

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(b) Investments (continued)

Fair values of investments are determined as follows:

Bonds and equities are valued at year-end quoted market prices where available. Where quoted prices are not available, estimated fair values are determined using alternative sources in the industry.

Short-term notes, treasury bills and term deposits maturing within a year are stated at cost, which together with accrued interest income approximates fair value given the short-term nature of these investments.

Guaranteed investment certificates, term deposits maturing after a year and mortgages are valued at the present value of estimated future cash flows discounted at interest rates in effect on the last business day of the year for investments of a similar type, quality, and maturity.

Pooled fund investments are valued at the unit values supplied by the pooled fund administrator, which represent the Plan's proportionate share of underlying net assets at fair values, determined using closing market prices.

(c) Net realized gain (loss) on sale of investments

The net realized gain (loss) on sale of investments is the difference between proceeds received and the average cost of investments sold.

(d) Investment income

Investment income, which is recorded on the accrual basis, includes interest and dividend income.

Brokers' commissions and other transaction costs are recognized in the statement of changes in net assets available for benefits in the year incurred.

(e) Foreign currency

Transactions in foreign currencies are accounted for using the exchange rates in effect at the transaction date. At year end, investments in foreign currencies are accounted for at the rates of exchange in effect at year end and the resulting unrealized gains or losses are included in the current period change in market values of investments.

(f) Use of estimates

The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the dates of the financial statements and the reported amounts of changes in net assets available for benefits during the year. Actual results could differ from those estimates.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(g) Future new accounting pronouncement

The Accounting Standards Board's ("AcSB") April 2008 Exposure Draft, Adopting IFRS in Canada, proposed that, upon adoption of International Financial Reporting Standards ("IFRS") by publicly accountable enterprises, pension plans would continue to prepare their financial statements in accordance with The Canadian Institute of Chartered Accountants' ("CICA") Handbook Section 4100, Pension Plans ("Section 4100"), rather than International Accounting Standards 26, Accounting and Reporting by Retirement Benefit Plans. On July 30, 2009, the AcSB issued an Exposure Draft that proposed changes to existing Section 4100 in the areas of presentation and disclosure. It also provided more guidance on how to measure fair value of investment assets and investment liabilities. In February 2010, the AcSB approved CICA Handbook Section 4600, Pension Plans ("Section 4600"), as Part IV of the CICA Handbook. The new Section 4600 was released in April 2010 and is based on existing Section 4100 with substantive modifications and will be effective for annual financial statements for fiscal years beginning on or after January 1, 2011. The University is currently assessing the impact of this standard on the Plan.

3. IMPACT OF NEW ACCOUNTING STANDARDS

In June 2009, the CICA amended Section 3862, Financial Instruments - Disclosures, to include additional disclosure requirements about fair value measurements of financial instruments and to enhance liquidity risk disclosures. These amendments require a three level hierarchy that reflects the significance of the inputs used in making the fair value measurements. Fair values of assets and liabilities in Level 1 are determined by reference to quoted prices in active markets for identical assets and liabilities. Assets and liabilities in Level 2 include valuations using inputs other than quoted prices for which all significant outputs are observable, either directly or indirectly. Level 3 valuations are based on inputs that are unobservable and significant to the overall fair value measurement. These amendments are effective for the Plan for the year ended June 30, 2010.

The additional disclosures as a result of adopting these sections have been detailed in note 8(a).

4. FUNDING POLICY

The University is required to provide funding, based on triennial valuations and any current legislative requirements, necessary to ensure that benefits will be fully provided for at retirement. The University's funding policy is to make contributions from time to time using the level premium method as determined by the actuary.

The most recent actuarial valuation for funding purposes was prepared as at July 1, 2008 by William M. Mercer Limited. A copy of the valuation was filed with the Pension Commission as required by the Pension Benefits Act of Ontario.

Audit fees	6,835	6,915
Miscellaneous	99,508	77,944
	1,119,813	1,134,762

8. FINANCIAL INSTRUMENTS

(a) Fair values

The fair values of investments are as described in note 2(b). The fair values of other financial assets and liabilities, being cash, accrued interest and dividends, and accrued liabilities approximate the carrying values due to the short term nature of these financial instruments.

Fair value measurements recognized in the statement of net assets available for benefits are categorized using a fair value hierarchy that reflects the significance of inputs used in determining the fair values.

- Level 1 - unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 - inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3 - inputs for assets and liabilities that are not based on observable market data.

The following table illustrates the classification of the Plan's financial instruments using the fair value hierarchy as at June 30, 2010:

	Level 1 \$	Level 2 \$	Total \$
Cash and short term investments	1,489,582	6,109,931	7,599,513
Canadian bonds and debentures	-	112,744,866	112,744,866
Canadian common and preferred shares	37,068,438	45,033,673	82,102,111
Non-Canadian shares	-	85,436,108	85,436,108
	38,558,020	249,324,578	287,882,598

(Registration Number: 0366849)
Notes to Financial Statements

Year ended June 30, 2010

8. FINANCIAL INSTRUMENTS (continued)

(b) Associated risks

(i) Market price risk:

Market price risk is the risk that value of an instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issue or all other factors affecting all instruments traded in the market. As all of the Plan's financial instruments are carried at fair value with fair value changes recognized in the statement of changes in net assets available for benefits, all changes in market conditions will directly affect the change in net assets available for benefits. Market price risk is managed by the Administrator through construction of a diversified portfolio of instruments traded on various markets and across various industries. In addition, market price risk may be hedged using derivative financial instruments such as futures contracts.

The Plan's investments in equities are also sensitive to market fluctuations. An immediate hypothetical decline of 10% in equity values will impact the Plan's equity investments by an approximate loss of \$ 16,753,822.

(ii) Liquidity risk:

Liquidity risk is the risk that the Plan will not be able to meet its obligations as they fall due. The Plan maintains an investment policy, as approved by the Administrator, which contains assets mix guidelines which help to ensure the Plan is able to liquidate investments to meet its pension benefit or other obligations.

(iii) Credit risk:

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause another party to incur a financial loss. The University does not expect any counterparties to fail to meet their obligations given their high credit ratings. The University has established policies and minimum credit rating requirements for such investments.

The Plan's fixed income investments are in Canadian-issued instruments and are diversified among federal, provincial, corporate and other issuers. In order to minimize the exposure of risk, a comprehensive investment policy has been developed. There were no significant concentrations of credit risk in the portfolio in either 2010 or 2009. The maximum credit risk exposure as at June 30, 2010 is \$ 112,744,866.

The breakdown of the total Canadian bonds and debentures by credit ratings as at June 30, 2010 is:

Credit Rating	2010 Fair Value \$	2009 Fair Value \$
AAA	40,895,940	39,342,052
AA	25,185,127	28,323,377
A	41,203,321	47,003,114
BBB	5,460,478	3,708,531
	112,744,866	118,377,074

UNIVERSITY OF WINDSOR RETIREMENT PLAN FOR FACULTY AND CERTAIN EMPLOYEES

(Registration Number: 0366849)
Notes to Financial Statements

Year ended June 30, 2010

8. FINANCIAL INSTRUMENTS (continued)

(iv) Interest rate risk (continued):

Interest rate risk is the risk that the market value of the Plan's investments will fluctuate due to the changes in the market interest rates. To properly manage the Plan's interest rate risk, appropriate guidelines on the weighting and duration for the bonds and other fixed income investments are set and monitored. The Plan's investments in fixed income are sensitive to interest rate movements. An immediate hypothetical 100 basis point or 1% increase in interest rates, with all other variables held constant, would impact Canadian bonds and debentures by an estimated loss of approximately \$ 9,180,000.

(v) Foreign currency risk:

Foreign currency risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign currency rates. The Plan invests in financial instruments and enters into foreign transactions denominated in Canadian dollars. The Plan is exposed to risks that the exchange rate in the foreign currency may change in a manner that has an adverse affect on the value of the portion of the Plan's underlying assets or liabilities invested in foreign transactions. The Plan's overall currency positions and exposures are monitored on a regular basis by the Administrator. The sensitivity to foreign currency risk is included in the market price risk analysis.

9. CAPITAL RISK MANAGEMENT

The main objective of the Plan is to sustain a certain level of net assets in order to meet the pension obligations of the University, which are not presented or discussed in these specified-purpose financial statements. The Plan fulfills its primary objective by adhering to specific investment policies outlined in its Statement of Investment Policies and Procedures (the "SIPP"), which is reviewed annually by the University. The Plan manages net assets by engaging knowledgeable investment managers who are charged with the responsibility of investing existing funds and new funds (current year's employee and employer contributions) in accordance with the approved SIPP. Increase in net assets are a direct result of investment income generated by investments held by the Plan and contributions into the Plan by eligible employees and by the University. The main use of net assets is for benefits payments to eligible Plan members. The Plan is required to file financial statements with the Financial Services Commission of Ontario.
