MHK Statement of Interest Form

A Statement of Interest is a crucial part of most graduate school applications.

It may also be called a 'Statement of Intent,' 'Description of Research Interests,' or something similar. Basically, the 'Statement of Interest' is your opportunity to tell those within the MHK program:

- Your specific area of academic interest (and possibly the research topic you want to work on);
- How your past education and other experiences have prepared you to be successful in our graduate program;
- What you hope to achieve in the graduate program, and;
- Why the MHK program at the University of Windsor is the best place for you to pursue your interests.

The statement is generally in the form of a short essay that must be contained within the space provided on the subsequent two (2) pages.

Some other tips for writing a strong Statement of Interest include:

- Stating any work that you have done related to your identified field of study (mention specific skills/techniques you have picked up along the way);
- Connecting your area of interest to research currently being completed by faculty associated with the MHK program (you can even mention specific faculty members and/or projects);
- Referring to academic publications that have informed your interest in a particular area (remember to use correct citation formatting), and;
- Mentioning any publications, presentations, or conferences that you have been a part of.

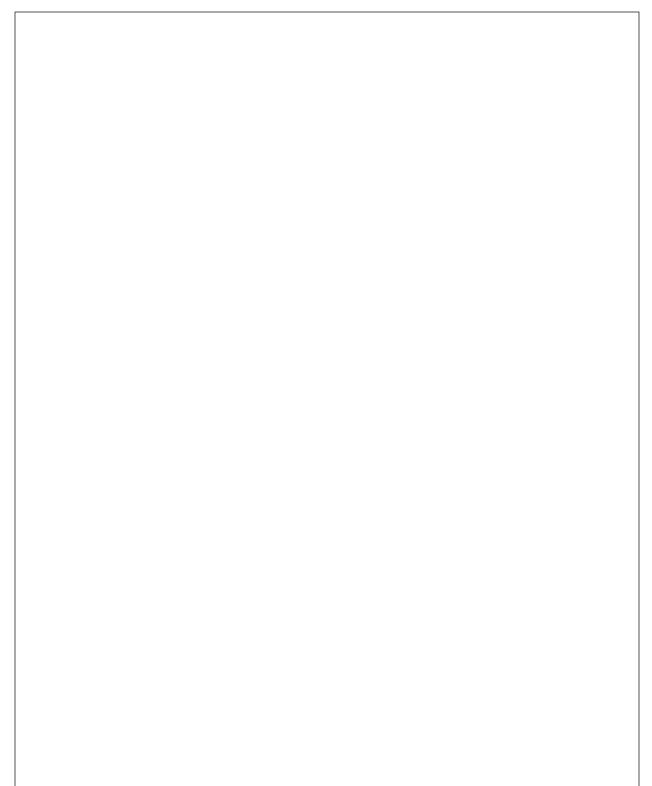

Finally, always remember that you are providing the necessary evidence to show that you are focused, skilled, enthusiastic, and a great match for the MHK program in the Faculty of Human Kinetics at the University of Windsor.
