

Doctor of Philosophy in Nursing (PhD)

The PhD program, focusing on health outcomes and health services research, will involve four years of **full-time** study. It will combine coursework, comprehensive exams and a dissertation. This program will prepare graduates to assume leadership roles in academic and practice settings. Research and scholarly activities will prepare graduates to contribute to nursing practice, the design and delivery of health care, and policy development.

The PhD program will normally involve four years of full-time study consisting of course work (most of it in Year 1), a comprehensive exam and a dissertation. The dissertation requires independent, original research and makes up at least two thirds of the time normally required for the program.

Applicants to the Faculty of Nursing PhD Program are not required to identify a supervisor before beginning the program. Students admitted to the program are assigned a faculty advisor in the first semester of study. Faculty advisors may transition to the role of supervisor. If not, faculty advisors will assist with selection of a supervisor.

Essential Academic Requirements

- Must have a completed baccalaureate degree in nursing from a recognized university.
- Must have a completed Master's degree in nursing or other relevant discipline from a recognized university.
- Must have current registration in a Canadian jurisdiction with no practice restrictions. Must be registered with the College of Nurses of Ontario prior to registration for thesis credits.
- Have a minimum 77% (B+) average in their Master's program.
- For international students, successful completion of an English Language Proficiency Exam may be required. IELTS—minimum score: 7.0 or Canadian English Language Benchmark Assessment for Nurses (CELBAN): Minimum scores: Writing - 7; Speaking - 8; Listening - 10; Reading - 8.
