

When I was really young, I was in the hospital because of severe dehydration and this almost resulted in kidney failure. While I was in the hospital on the paediatric floor, I received exceptional nursing care. This inspired me because they totally changed the outcome of my view on healthcare because I personally felt that I was alone and caring for myself. Meanwhile, a nurse advocated for me to be admitted and the nurses on that floor gave me exceptional care which resulted in a full recovery and inspired me to be a nurse to give back that same care. -Derek Legault, Year 4 Nursing (class of 2021)
