The School of the Environment

School of the Environment invites internal and external applications from qualified individuals who are interested in teaching the following courses:

<p><b>ESCI 1130-1</b> <b>Atmosphere and Climate</b> <b>LEC: Wednesdays 7:00pm-9:50pm</b> <b>This course is taught on-line.</b></p>	<p>An introduction to the atmosphere and the basic principles of meteorology and climatology. Topics include weather systems, atmospheric pollution and inadvertent climate modification, climate change and relationships between climate and living organisms. (3 lecture hours a week.)</p>
<p><b>ESCI 2020-30</b> <b>Discovering Dinosaurs</b> <b>LEC: Thursdays 7:00pm-9:50pm</b> <b>This course is taught in person.</b></p>	<p>The origin, evolution, behaviour, ecology, and extinction of dinosaurs, and how these aspects of dinosaur science are understood through the study of their fossils. How the public perception and scientific interpretation of dinosaurs have changed over time as a result of new discoveries. (3 lecture hours per week)</p>
<p><b>ESCI 2600-1</b> <b>Principles of Resource Management</b> <b>LEC: Tuesdays 7:00pm-9:50pm</b> <b>This course is taught in person.</b></p>	<p>Systems analysis methodologies, scientific theories, ecological approaches, and sustainable resource management principles will be presented to examine the interrelationships governing the availability and cumulative impacts of utilizing both renewable and non-renewable resources. Resource management auditing methods and techniques will be applied for the assessment of several indicators, including carrying capacity, ecological footprints, demographic transition, energy flows, agrosystems, land degradation, air and water quality, deforestation, biodiversity and successional changes. Discussions will also focus on integrative and adaptive resource management techniques and best management practices. (3 lecture hours a week.)</p>
<p><b>ESTU 4808-91, will be changing to ESTU 2200.</b> <b>Societal Adaptation to Climate Change</b> <b>LEC: Mondays 7:00pm-9:50pm</b> <b>This course is taught on-line.</b></p>	<p>This course examines how communities prepare for and react to the effects of climate change. Beyond looking at merely technical solutions, students will investigate how institutions, governments, and people adapt to climate hazards through social, economic, and cultural responses. Community resilience, climate governance, disaster risk reduction, and the boundaries and moral implications of adaptation are some of the major issues. (3 Lecture Hours, On-line Synchronous).</p>
