

# Holography: A look into the invincible

---

**Location:** Windsor High School (To be announced with more detail)

**Date:** April 10, 2010

**Presenters:** Abbey Garant, Bryan Hollister, Ilma Xhaferllari, and Mehdi Mehdi.

## Outline:

- Holography is seen in movies, TV, credit cards and cheques to ensure security, grocery stores, etc.
- A hologram is a three dimensional capture of an object and allows for objects behind the hologram to be seen as well.
- The two most common types of holographic set-ups are reflection holograms and transmission holograms
- If the hologram image is cut into different pieces, each piece will contain the whole image
