

**Academic Policy Committee
University of Windsor**

5.2: **Proposed Revisions to Board of Governors In-Course Medals and Calculation of Averages**

Item for: **Approval**

Forwarded by: **Marian Doll, Student Awards and Financial Aid**

MOTION: That the following revisions be made to the Board of Governors In-Course Medals and the Calculation of Averages:

Board of Governors In-Course Medals

These medals are awarded annually, **in the Fall semester**, to the **undergraduate** student in each Faculty who had the highest cumulative average of all non-graduating students at the end of the preceding regular (September - May) session. A minimum cumulative average of 78.5% is required. The student must have completed the equivalent of at least ten courses at the University and must ~~have been~~ **be** registered full-time in an **honours** degree program.

Students are considered for this medal based on the Faculty in which they are enrolled at the time the medals are awarded.

Calculation of Average

[...]

Add:

Calculation of Averages for Scholarship/Award Purposes

The cumulative average is rounded to the nearest one-hundredth for the purposes of calculating a student's cumulative average.

Rationale:

These proposed revisions formalize current practice and provide greater clarity on the process and eligibility criteria for these awards.
